

LEMONAID UPCYCLING - DIY BIKE RACK

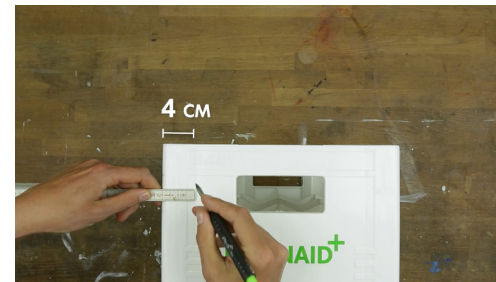

DURATION: 40 MIN · DEGREE OF DIFFICULTY: MEDIUM

1. Take the empty Lemonaid box first.

2. Draw a horizontal saw line on the front above and below the handle hole.

3. Draw markings on the right side of the box - 4 cm from the front..

4. ... and 7 cm from the top..

5. Do the same on the left side of the box.

6. Drill a 50 mm wide hole with the hole saw at the intersection of the markings on the left side...

7. ... and the right side.

8. Now draw saw lines on the upper and lower sides of the holes,...

Equipment:

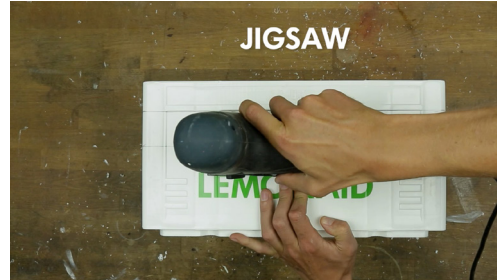

- 1 empty Lemonaid crate
- Hole saw (50 mm)
- Jig saw
- Sandpaper
- Wooden board (see our "DIY Stool" tutorial)

More Information:
lemon-aid.de/diy

9. ... which connect to the respective lines on the front.

10. Saw along the resulting continuous lines from one side of the crate to the other.

11. Sandpaper the edges.

12. Put the wooden plate (see our "DIY Stool" tutorial) on the crate.

13. Now just fix the rack to the wall with screws, hang up the bike - that's it!
